

CHAPTER V

CONCLUSION AND SUGESSTION

A. Conclusion

Based on the data from the research that has been done, it can be concluded that the teacher's experience about using google classroom during covid-19 is very helpful in the learning process during the current covid-19 period. By using this google classroom application, it helps learning to be more effective and productive, and this application also saves time when using it. In addition, this application is very easy and simple to use. The English teachers at SMP Negeri 4 Sungai Raya also learn quickly how to use this google classroom application. The teacher also feels that this application is easy to remember how to use and this application is fun for me to use in learning. This google classroom app works as the teacher expects, because there are many useful and very helpful features.

Meanwhile, by using the Google Classroom application, teachers can monitor student learning activities, such as attendance, explanation of material and delivery of assigned tasks. For media used by teachers, teachers usually use learning media in the form of videos, pictures and PPT. The learning process using Google Classroom is used for every teaching and learning activity, namely every Monday-Friday during the covid-19 period. The things that must be prepared by teachers in using Google Classroom are that online learning has been going well. The strategy used by the teacher is to convey material that is only in the form of points so that students do not get bored.

In learning using Google Classroom, it has been seen that students can already use Google Classroom as an online learning medium during the Covid-19 period and also from the student's score that has reached the KKM. Furthermore, in evaluating the use of Google Classroom, the teacher evaluates the usual assessment, namely cognitive, affective, and psychomotor which are observed from student learning outcomes. Assessment of student attitudes can be observed in online learning which can be seen in online learning that shows

good student attitudes. Psychomotor assessment is observed through practical activities.

B. Sugestion

The sugesst ion that the researcher conveys regarding research on Teachers' Experiences on the Use of Google Classroom During Covid-19 at SMP Negeri 4 Sungai Raya as follows:

1. To teachers to continue to be enthusiastic in teaching, educating, delivering material in situations like this (covid-19). Continue improve competence and skills by continuing to learn in accordance with the development of science and technology and be able to choose and use the most suitable method varies in the learning process.
2. To prospective English education teachers and other teacher candidate such as researcher not to stop at just one bench in take education and do not give up in developing current competencies and skills.
3. To students please study seriously, try to focus and be consistent during the learning process. Avoid all kinds of things that have the potential to interfere with the learning process and prepare the technology needed, especially preparing a good internet network and adequate quota.
