

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

From the results of research and discussion of student difficulties in writing thesis. From these data, the researcher found that all students experienced difficulties in writing their thesis. The researcher found that the factors that influence students' difficulties in writing thesis are personality factors, socio-cultural factors, and linguistic factors. Students experience difficulties in self-esteem such as in determining the topic of thesis writing and also difficulties in finding the right literature review. Then, students also experience difficulties in understanding university culture. It was about the difficulty in understanding the standard format for writing a thesis at university. The last one is about paraphrasing sentences from sources to writing their thesis. In addition, from three factors consisting of personality factors or internal factors and sociocultural, linguistic or external factors, the most difficult factor in thesis writing is personality or internal factors..

B. Suggestion

The research results are expected to provide a proper contribution to students. There are several suggestions based on the results of this study. For IKIP PGRI Pontianak students. In writing a thesis, choose a new problem or a new topic. Choose an interesting problem or topic that has never been researched before. Then, choose a problem or topic according to the ability of the researcher. Because it will affect the solution. Reading books, journals also have to be done a lot by researchers. Because it will make researchers have an idea of the research to be carried out.
